Executive Summary

The University of Tasmania Motorsport Team (UTAS Motorsport Team), established in **2001**, is one of the university's longest-running student engineering programs and a cornerstone of hands-on technical education in Tasmania. For **more than two decades**, the team has provided students with a unique platform to apply theoretical knowledge in a real-world, high-performance engineering environment.

As a **student-led organisation**, the team designs, manufactures, and tests Formula SAE race vehicles, competing nationally while representing Tasmania's growing engineering capability. Our team brings together students from engineering, business, science, arts, and technology degrees, creating a **multidisciplinary environment** that mirrors the structure and expectations of professional motorsport and advanced manufacturing industries.

We are seeking partnerships with businesses who value innovation, education, and community development. Sponsorship of the team directly supports the next generation of Tasmanian engineers, technicians, and industry leaders, while providing meaningful visibility and engagement opportunities for our partners.

Your support strengthens student learning, enhances Tasmania's presence in national motorsport, and contributes to the advancement of engineering excellence within the state.

Introduction to the Team

The UTAS Motorsport Team was founded in 2001 with a clear purpose: **to give students the opportunity to engage in practical, industry-aligned engineering and project work that extends far beyond the classroom**. Over the years, the team has evolved into a highly collaborative, multidisciplinary organisation where students gain experience in design, manufacturing, business operations, leadership, and motorsport engineering.

Our team operates much like a professional motorsport outfit. Students work across specialised sub-teams—including mechanical design, electrical systems, aerodynamics, manufacturing, business, and operations—while contributing to the collective goal of producing a competitive Formula SAE vehicle. This structure ensures that every member, regardless of degree or background, plays a meaningful role in the team's success.

What truly defines the team is its culture. We are a **close-knit group** of passionate individuals who share a strong commitment to innovation, teamwork, and continuous improvement. The team environment encourages mentorship, problem-solving, and personal growth, creating a supportive space where students can challenge themselves, develop new skills, and build confidence in their abilities.

Beyond engineering, the UTAS Motorsport team fosters leadership, communication, and professional readiness. Students learn to manage deadlines, collaborate under pressure, and engage with industry professionals. These experiences prepare our members for future careers in engineering, manufacturing, motorsport, and related industries, making the team one of the most valuable student development programs at the University of Tasmania.

Team Achievements

Across more than 25 years of operation, the University of Tasmania Motorsport Team has built a strong reputation for professionalism, innovation, and community engagement. Key achievements include:

2001: Establishment of the team and development of the first generation of Formula SAE-style vehicles. 6th overall out of 18 teams

2002: Keeping the 2001 chassis, the 2002 car was fitted with new internal parts based on judge's criticisms

2014: A return to competition. After a 12-year hiatus the team came 18th out of 26th but managed to achieve **3rd place for fuel efficiency** and the **CAMS 'Inspiring Motorsport Award'**.

2015: Back in the midfield coming 15th out of 30 teams, however a dramatic improvement in static events placing 5th in Business presentation

2016: Consistent participation in the national Formula SAE competition, with year-on-year improvements in design and performance

2017: Our **first Electric Vehicle** went to competition with the team switching from combustion vehicles.

2018: Introduction of structured engineering workflows across mechanical, electrical, and aerodynamic systems.

2019: Strengthened presence at major Tasmanian motorsport events.

2020-2021: Competition not held due to covid

2022: A return to track, with the team being only **1 of 6 teams to complete all dynamic events** out of a total 20 teams.

2023: **4th overall** and **3rd in the endurance** event.

2024: A competitive return to racing, **2nd in efficiency and cost**.

2025: Increased statewide presence by attending a broader range of community and motorsport events, significantly boosting public engagement and sponsor visibility. Built on the successful 2024 engineering methodologies to further streamline design, testing, and team coordination.

Ongoing:

- Successful design, construction, and testing of multiple competition vehicles
- Involvement in Targa Tasmania and statewide club-held events.
- Creation of hands-on learning pathways supporting students entering engineering, manufacturing, and motorsport careers

These achievements reflect the team's long-standing commitment to continuous improvement, technical excellence, and community contribution.

Team Structure and Culture

2026 marked a transformative year for the team, with membership growing by 48%, significantly expanding our engineering capability and event presence. Female participation rose by 250%, creating the **most diverse and inclusive cohort in the program's history**.

Building on this growth, the University of Tasmania Motorsport Team continues to operate with a streamlined structure that promotes collaboration, accountability, and professional development. Our small team size remains a strategic advantage: every member holds meaningful responsibilities, contributes directly to project outcomes, and gains hands-on experience across multiple disciplines.

Our culture is built on:

- Professionalism and respect
- Shared learning and mentorship
- A strong sense of community
- A collective passion for motorsport and engineering excellence

This environment not only strengthens technical capability but also develops essential professional skills such as leadership, communication, teamwork, and problem-solving — preparing students for careers in engineering, manufacturing, motorsport, and beyond.

Engineering, Testing, and Technical Development

Our engineering program is grounded in rigorous design, manufacturing, and validation processes. The team conducts numerous testing days throughout the year, each structured to gather performance data, evaluate component reliability, and refine vehicle systems.

Testing activities include:

- Data acquisition and analysis
- Driver training and safety procedures
- Mechanical troubleshooting and optimisation
- Validation of design decisions under real conditions

These sessions provide students with hands-on experience that cannot be replicated in traditional academic settings. They also demonstrate the team's commitment to continuous improvement and technical excellence.

Community Engagement Across Tasmania

The University of Tasmania Motorsport Team is deeply embedded in the state's motorsport community. Our participation in events across Tasmania allows us to showcase our work, engage with the public, and strengthen relationships with motorsport organisations.

Key engagements include:

- **Supercars Tasmania** — vehicle displays, public interaction, and representation of student innovation
- **Targa Tasmania** — involvement in community motorsport culture
- **Local club events** — grassroots engagement and volunteering

These events provide significant visibility for our team and our partners, reinforcing our commitment to supporting and uplifting the Tasmanian motorsport community.

Value to Local Businesses

As a smaller team, we understand the financial constraints many Tasmanian businesses face. Our sponsorship model is built on **community partnership**, not transactional advertising.

Supporting our team means:

- Investing in Tasmanian students and future professionals
- Strengthening local engineering and manufacturing capability
- Supporting a community-driven initiative with statewide presence
- Contributing to educational and professional development opportunities

Your support **directly impacts** the team's ability to innovate, compete, and represent Tasmania on a national stage.

Student Development and Career Pathways

Participation in the University of Tasmania Motorsport Team provides students with unparalleled opportunities for professional growth. Members gain experience in:

- Engineering design and manufacturing
- Project management and leadership
- Business operations and stakeholder engagement
- Technical problem-solving under real-world conditions
- Industry networking and professional communication

These experiences are invaluable and often serve as stepping stones into careers in engineering, motorsport, manufacturing, and related industries.

Sponsorship Tiers and Benefits

The University of Tasmania Motorsport Team offers a structured sponsorship framework designed to provide clear value, professional visibility, and meaningful engagement opportunities for partners.

Platinum Partner

- Large logo placement on car, team merchandise, and promotional materials
- Featured presence at events
- Social media promotion
- Collaborative marketing opportunities
- Opportunities to drive the team's vehicle during designated demonstration sessions
- Team event invitations
- Complimentary team merchandise
- Tour of team office (upon request)

Gold Partner

- Large logo placement on car, team merchandise, and promotional materials
- Featured presence at events
- Social media promotion
- Professional team photo
- Formal event invitations

Silver Partner

- Medium logo placement on car, team merchandise, and promotional materials
- Social media acknowledgement
- Team photo
- Formal event invitations

Bronze Partner

- Small logo placement on car, team merchandise, and promotional materials
- Social media acknowledgement
- Formal event invitations

Supporter

- Social media acknowledgement
- Team photo

Our Commitment to Partners

We are committed to maintaining strong, transparent, and mutually beneficial relationships with our sponsors. We ensure:

- Professional representation of your brand
- Regular updates on team progress
- Visibility at events and public engagements
- Opportunities for collaboration and community involvement

Your support becomes part of our team's story and success.

Contact and Next Steps

We welcome the opportunity to discuss partnership options and tailor sponsorship arrangements to suit your organisation's goals. Whether you are interested in supporting engineering education, strengthening Tasmania's motorsport community, or increasing your brand's visibility, we are ready to work with you.

To begin a conversation or request further information, please contact:

Angelica Graham Team Representative — UTAS Motorsport Team: agraham7@utas.edu.au

We are happy to arrange meetings, provide additional documentation, or explore customised partnership opportunities. Your support plays a direct role in advancing student development, engineering innovation, and Tasmania's presence in national motorsport.
